

The Currency of Connection Between Artists and Fans

Overview

RiffCoin (RFC) is a purpose-built cryptocurrency created for musicians and the fans who support them. RFC is more than a token—it's a tool for amplifying support, tips, purchases, and engagement into something with long-term value. With secure, transparent tokenomics and a fair rewards system, RFC gives artists a path to financial freedom—without ever needing to invest a dollar themselves.

Mission

To empower musicians globally with a zero-risk, community-supported financial ecosystem. RiffCoin enables fans to tip, support, and interact with their favorite artists using a token that may grow in value over time—supporting artists today and potentially benefiting them even more in the future.

Vision

RiffCoin envisions a world where artists can monetize their work in a decentralized way. It's a risk-free option to build a pension fund, grow an investment-like balance, or simply accept digital tips that appreciate with the community's success. Fans empower artists by supporting them with RFC, knowing the value of that support may grow over time.

Token Details

Property	Value
Token Name	RiffCoin
Symbol	RFC
Network	Binance Smart Chain (BSC)
Total Supply	5,000,000,000 RFC
Decimals	18
Contract Ownership	Held via secure cold wallet (Ledger)

Initial Distribution

Wallet	Allocation
Liquidity Pool Wallet	3,000,000,000 RFC
Community Wallet	1,000,000,000 RFC
Development Wallet	1,000,000,000 RFC

Note: Community and Dev wallets are excluded from reflections and considered non-circulating. These tokens may be reintroduced strategically to support growth.

Fee Structure

RFC's fee system supports long-term sustainability, fair distribution, and liquidity strength.

Transaction Type	Total Fee Breakdown
Wallet-to-Wallet Transfer	3% 1% Reflection, 1% to Community, 1% to Dev
Buy from Liquidity Pool	3% 1% Reflection, 1% to Community, 1% to Dev
Sell to Liquidity Pool	3% 1% Reflection, 1% to Community, 1% to Dev

Note: Whitelisted addresses are exempt from all fees and cooldowns.

Trading Controls & Security

- **Transaction Limits (LP Only):**
 - Max Buy: 100,000,000 RFC
 - Max Sell: 5,000,000 RFC
 - No limit on wallet-to-wallet transfers
- **Cooldown System:**
 - 5-minute cooldown between trades for non-whitelisted wallets
 - 5-second anti-fast-trade delay prevents rapid bot cycling
- **Blacklist & Whitelist System:**
 - Malicious wallets can be blacklisted
 - Trusted addresses can be whitelisted to bypass limits and fees
- **Liquidity Lock & Anti-Rug System:**
 -  Liquidity is locked until 2029

- [View Lock Certificate on Mudra](#)
 - All buy/sell fees go directly to the Liquidity Pool Wallet, deepening the pool with each trade
 - **Liquidity Access Restriction:**
 - Only whitelisted wallets can send RFC to the official liquidity pool
 - Prevents unauthorized LP additions, farming, or stealth manipulation
 - Strengthens defense against soft rug pulls and LP hijacking
-

Ownership, Admin Controls, & Security

- All contract admin actions are restricted to a cold wallet (Ledger)
 - No actions can be executed remotely or from a hot wallet
- Admin capabilities include:**
- Trading pause/resume
 - Wallet black/whitelisting
 - Designating LP providers
 - Setting LP address
 - Including/excluding wallets from reflections
 - Recovering non-RFC tokens sent to the contract
-

Reflection System

RFC uses a reflection-based reward system, redistributing 1% of each transaction to holders:

- Simply holding RFC earns you more over time
 - Community and Dev wallets are excluded from reflections
 - Reflections compound alongside price growth
-

Why RiffCoin Matters

For Artists:

-  Earn RFC directly from fans
-  No financial investment required
-  Grow balance over time through reflections and fees

For Fans:

-  Tip like always, but now with long-term potential
-  Support today—give your favorite artists a chance to grow with you
-  Be part of an artist-first crypto ecosystem

Liquidity Strategy

-  RFC is paired with USDT to reduce volatility
-  No BNB pair (to avoid market swings)
-  Buy/sell fees go directly to the Liquidity Pool Wallet
-  [Liquidity is locked until 2029 \(View on Mudra\)](#)
-  LP access is strictly controlled through whitelist logic

Long-Term Use Cases

RFC is designed for lasting value and utility:

-  Tipping musicians
-  Buying music, content, and merchandise
-  Supporting artists' digital portfolios
-  Passive earnings through reflections
-  Artist-to-artist transfers and collaboration tools (future)

A tip becomes a long-term asset. RFC makes support scalable and impactful.

Final Words

RiffCoin isn't just a token—it's a movement. It amplifies the connection between artists and fans by giving them both something with staying power. It's a safe, secure, and transparent ecosystem where generosity becomes potential growth. Whether you're an artist, a fan, or a believer in decentralized creativity—welcome to RiffCoin.
